

Quake Destroyer

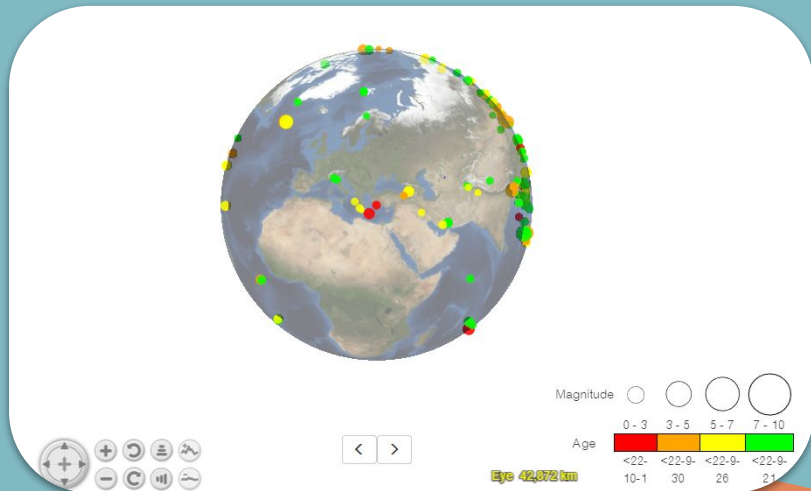

Data Analysis Developers Wanted!

Massive amounts of data

Nasa generates a massive amount of data every second and most of that is available to the public

Developers abandon open-source apps

Some developers don't continue their projects and often we see unmaintained codebases that were cool projects one day

Objective: Make information accessible

```

Hard to get, non user friendly information

Easy to use, maintainable application

Didactics

Engage users in a new way

By using sensors on the phone, we engage with the user in an innovative way

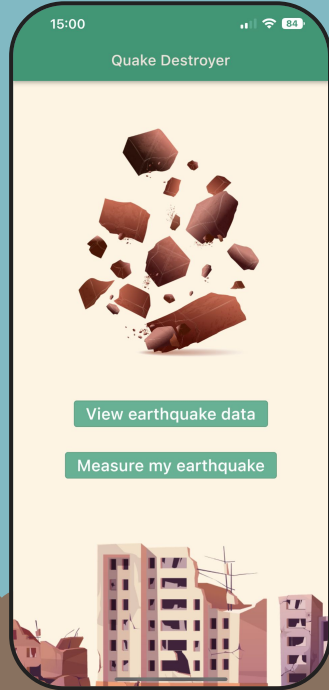

Make it multisensorial

Let's move our bodies and stimulate our body to learn science!

Gamefy-it!

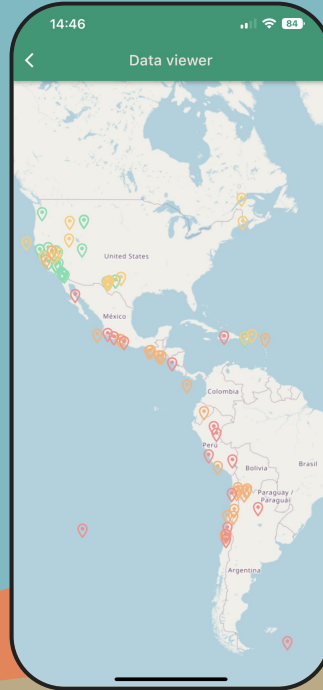

Try to beat your highest earthquake and compare it to others!

Quake Destroyer

See real data from
USGS Earthquake
Catalog.

Check the location
of earthquakes
and their details

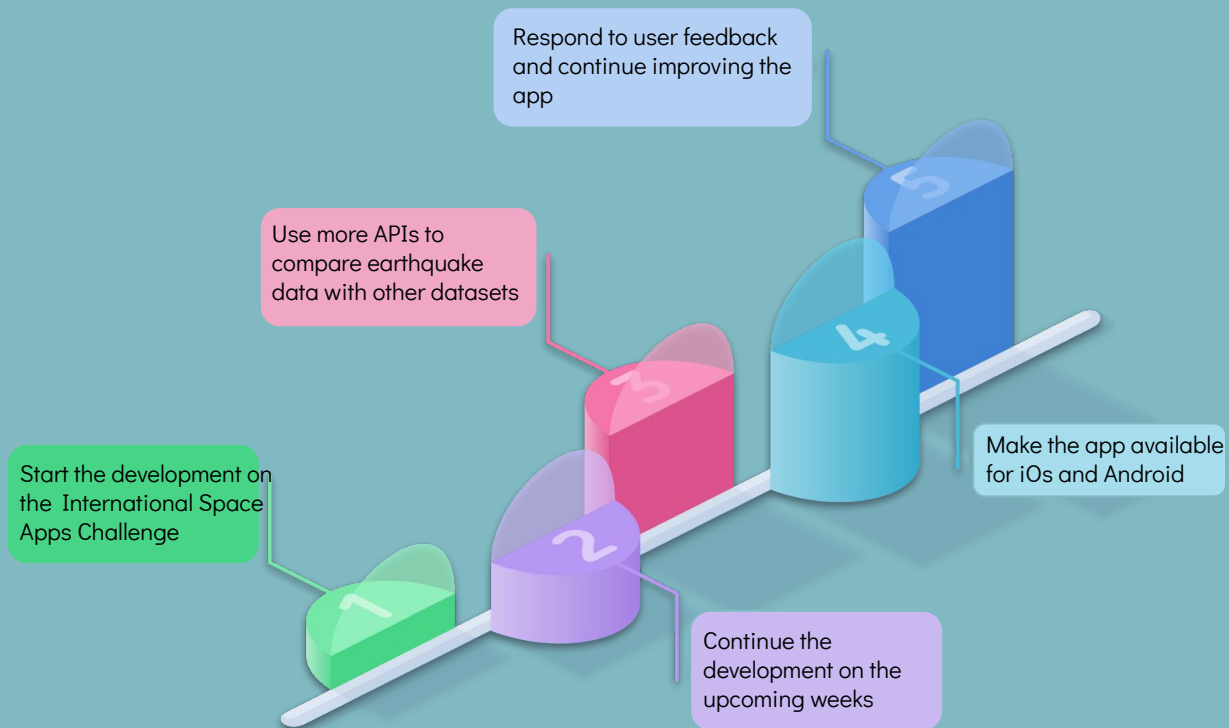

Understand how
an earthquake is
measured!

Move your phone
and score high on
the Richter Scale

Compare your
result with real life
earthquakes

Future

Thanks for reading!
